Elegant Design

The UARDIAC RHT incorporates a radial Duri-Flex™ high transmission optic between sloping acrylic panels providing the look and feel of a deep RDI luminaire — subtle soft indirect elements, interest and depth across the ceiling plane — with a kit that consumes minimal space and material.

Efficient Solution

The contoured side panels of the unit are high transmission acrylic that provide a low-brightness glow, with the majority of the light controlled through the center optical element.

Application

For use with most recessed lay-in fixtures in standard 15/16" grid ceiling systems.

Specifications

Door Frame

Features positive latching mechanism for easy re-lamping.

Direct Optical Component

High reflectance optical engine delivers main beam focus through the revolutionary Dur-iFlex™ HT diffusing panel. With 93% transmission and 89% haze, the result is extraordinary control and efficiency. The radial curve reduces interior reflections and improves transmission. The Radial HT geometry is particularly suited for single lamp conversions.

Reflector (optional not included)
High reflectance white reflector distributes light through both optical elements.

Diffuser Surround

(2) Sloping high transmission acrylic diffuser panels manage contrast and generate soft, even, higher angle luminance.

Luminaire Type

Fits most standard lay-in lensed or parabolic housings 2X2' and 2X4'.

Lamps

1 or 2-lamp T8 or T5 fluorescent reflector kits available.
